

Automotive

With more than 20 years experience partnering with leading international automotive OEMs, Sanmina-SCI offers a comprehensive portfolio of manufacturing services for automotive electronics and automotive components.

Manufacturing for the automotive industry requires the most advanced technologies, best materials, and most advanced manufacturing processes and quality systems. Sanmina-SCI not only offers world-class manufacturing solutions to the automotive industry, but provides design and engineering services proven to minimize cost and reduce time-to-market.

Plus, Sanmina-SCI has experience in Production Part Approval Processes (PPAPs), Process Failure Mode & Effects Analysis (PFMEA) and Failure Mode & Effects Analysis (FMEA). We also support our customers in achieving compliance with the European RoHS (Restriction of Hazardous Substances) and WEEE (Waste of Electrical and Electronic Equipment) legislations.

Our manufactured products include HVAC components (heater and blower modules), and crash avoidance and ultrasonic parking devices.
